Testing laboratory

## **QUALITY POLICY** (according to SRPS ISO/IEC 17025:2017)

The Center for Applied Circular Economy LLC, Šabac, Testing Laboratory offers sampling and testing services for fertilizers and raw materials used in their production, biostimulators, chemical products, waste, solid recovered fuels (SRF), solid biofuels, water, as well as testing of pharmaceutical products and soil.

The management and all employees of the Center for Applied Circular Economy LLC, Šabac, particularly those in the Testing Laboratory, are obliged to perform their duties and tasks in compliance with the requirements of the SRPS ISO/IEC 17025:2017 standard, based on the established and documented management system. They are committed to adhering to the general principles of good laboratory practice within their scope of work, as well as the principles of impartiality and consistency in the execution of operational activities.

Understanding the importance of service quality, the management and all employees are dedicated to the continuous improvement of all aspects of the management system and to ensuring consistent performance.

The management of the Center for Applied Circular Economy LLC, Šabac, and the Testing Laboratory itself is committed to ensuring competence, impartiality, confidentiality, and objectivity, as well as to continuously managing risks in the performance of laboratory activities.

Transparency in testing services, continuous improvement of technical-technological and human resources, and ongoing advancement of testing methods in accordance with international and European standards and normative documents are the responsibility not only of the management but also of all employees at the Center for Applied Circular Economy LLC, Šabac, particularly those in the Testing Laboratory.

The goal of the Testing Laboratory of the Center for Applied Circular Economy LLC, Šabac, is to ensure market competitiveness by transferring positive European and global experiences in the field of sampling and testing services to the domestic market, while respecting the principles of high professionalism, trust, and reputation in their work methods. By providing objective, repeatable, and traceable test results, verifying competence through PT/ILC (proficiency testing and interlaboratory comparisons), conducting regular internal and external audits of the management system, and implementing corrective actions and improvements, the aim is to ensure the satisfaction of service users and other interested parties, and to maintain data protection for clients and the results of provided services.

It is the responsibility of the management of the Testing Laboratory, within the company Center for Applied Circular Economy LLC, Šabac, to ensure and maintain all necessary conditions for the implementation of this Policy and objectives.

All personnel engaged in the laboratory are required to fully comply with this Quality Policy and the defined objectives.

The Quality Policy and objectives of the Center for Applied Circular Economy LLC, Šabac, Testing Laboratory are subject to continuous review by the management.

Šabac, 10.03.2025.  
General Manager
